

GLASS CONSIDERATIONS dimax[®]glasdruck

The norm ISO EN 2409 describes the durability of the prints which is proved by the „Cross Hatch Test“. In reference to this norm, the new technology provides best quality.

Dimaxglasdruck prints can be used in everyday life (kitchens, showers, sanitation facilities) but just in indoor applications.

Instructions of applicance and warnings

We recommend the subsequent cleaning:

- Always use a soft cleaning cloth, either dry or wet (maximum of 50°C)
- Soap water (maximum of 50°C)
- Household cleaning material (e.g.: Ajax, Clin, Glasrein)
- Special cleaning material for bathrooms (e.g.: Blue Star Bad Power Cleaner, Antikal)
- After great exposure to steam or humidity (e.g.: shower), we recommend to wipe off the glass first with a soft drapery and let it dry for at least 2 minutes before cleaning it with a special cleaning material.

Material that should NOT be used

- Abrasive cleaners (Cif Scheuermilch, Waschsand, Scotch Scheuerschwämme)
- Knives, blades and spatulas
- Acuate objects out of metal
- Acetic acid (>5% of acid)
- Blanching and oxidizing cleaners (e.g.: Danchlor)

Installation

- Just use silicones free of acetic acid (Ramsauer Dichtkleber 640 or Otto Chemie, Otto Coll S16).

Please consider that we are not liable for disregarding our advice.
